“

If there were 10 stars available, this plugin would get every one.
– Install – trouble free
– Setup – Minimal
– Instructions – so intuitive and easy to use I didn't need any
– Operation on page – simply beautiful with features you'd normally expect to pay a lot for
This is software of the highest quality and I thank you sincerely.

State of Art Design

ENHANCED PRESENTATION

Your flat documents are no longer boring.
They are now an artistic representation on
your websites.

“

This flipbook doesn't look artificial at all, it looks even better on the mobile. You can publish online-only e-books what means a lot if you are not allowed to publish downloadable books.

ELEGANT YET POWERFUL

Powered by complex 3D calculations and modern WebGL technology, Dearflip, is capable of providing an elegant book structure for any PDFs.

“

It works out of the box – we didn't have any trouble getting it to work or look perfect without much tinkering, but there are a lot of settings you can play with.

HARD COVER BOOKS

Your books get realistic hard covers that add distinction between the inner pages and the main cover. You can choose what color to set to the hard cover.

“

I'd give this 10 star if I could.

This was the definitely the best option for a flipbook with links imo but I couldn't get the link position to load properly. Support emailed me back, fixed the issue in the plugin, sent me a revised version and I had it running in under 24 hours.

Highly recommend!!

JUST FLIP IT!

Flipping the pages is eye catching and engaging. Exactly what you wanted for your web readers.

“

A beautiful and intuitive way to show pdfs - excellent for sites with lots of customer-facing PDFs or with magazine-like offerings/showcases. Lots of options to control the presentation. Worth the price. Decent customer support too!
